

The History of ZEC® - Made in Italy

□

ZEC® was established in 1958, and has specialized in producing abrasive fiber and plastic backed discs to be fitted on grinding machines and grinding power tools. The ZEC® disc is a result of advanced technology and advanced automation of the manufacturing process by implementing specific handling equipment. ZEC

© achieves steady improvements in their manufacturing process for improved air and water quality to protect our environment.

ZEC® Semiflex® and **ZEC® Litex® discs** represent the majority of ZEC® products.

The European Standard **EN 13743** proves the reliability and safety compliance of ZEC® discs.

ZEC® distributes its discs worldwide including

- [Marmamacc in Italy](#)
The official website of Verona's international exhibition of marble, stone, and technology.
- [Marmotec](#)
International exhibition of natural stone, equipment, and technology located at Marina di

Carrara, Italy

- [Batimat in France](#)

The essential meeting place for the French and international construction industry. BATIMAT 2011 will serve as one of the shop windows for these developments by featuring innovations and model projects by architects and hosting conferences and events.

- [International Hardware in Germany](#)
The leading global trade fair for the hardware industries.
- [World of Concrete in USA](#)

Since 1975, World of Concrete has been the industry's ONLY annual international event dedicated to the commercial concrete and masonry construction industries. Featuring indoor and outdoor exhibits, leading suppliers showcasing innovative products and technologies, exciting demonstrations and competitions, a world-class education program, and the information you need to help sustain and grow your business.
